WHY CHOOSE STANTRÆK A/S?

Tailored technical consulting

Optimization of customized solutions -
from prototype to running production

High precision, documentation and traceability

ISO-certified production with a high focus on quality -
Traceability throughout the process. Possibility of PPAP and SPC

Flexible and efficient logistics solutions

Efficient packaging, storage solutions and shipping -
Tailored to individual needs

Optimization of production processes

Automated production solutions increase efficiency -
Reduces errors and minimizes costs

Data & technology in production

Use of digital tools and paperless production management -
Ensures precision, traceability and flexibility

TOTAL SOLUTIONS

From idea to finished product – we contribute throughout the process to create a complete solution without difficulties.

YOUR STRATEGIC PARTNER

We focus on long-term collaboration, where we together develop and create value.

STANTRÆK

Solutions and beyond

50+ years of experience

Over 50 years in sheet metal processing and 20 years in global sourcing

- ✓ State-of-art production
- ✓ Professional consulting
- ✓ High understanding of needs

Sustainability

Our focus is integrity and continuous improvements in all processes

Quality assurance

We ensure high quality and traceability in all processes. Quality in all perspectives

- ✓ ISO 9001/14001
- ✓ High quality assurance
- ✓ Digital platform

Your partner for total solutions

Quality in all perspectives

Sheet metal processing

PROCESSES

CNC punching

Precise and flexible metal stamping with high uniformity (1250x2500 mm)

Automatic punching

Fast and uniform punching of large series with automation

Manual punching

Flexible punching for small series and special tasks

Laser cutting

Efficient laser cutting with minimal material waste (1500x3000 mm)

Edge bending

Automated bending of metal workpieces

PEM mounting

Mounting of PEM and bolts

Vibration deburring

Removes sharp edges and improves surface quality

Washing

Cleaning of items for best quality and cleanliness

MATERIALS

STEEL

COPPER

STAINLESS STEEL

ALUMINUM

BRASS

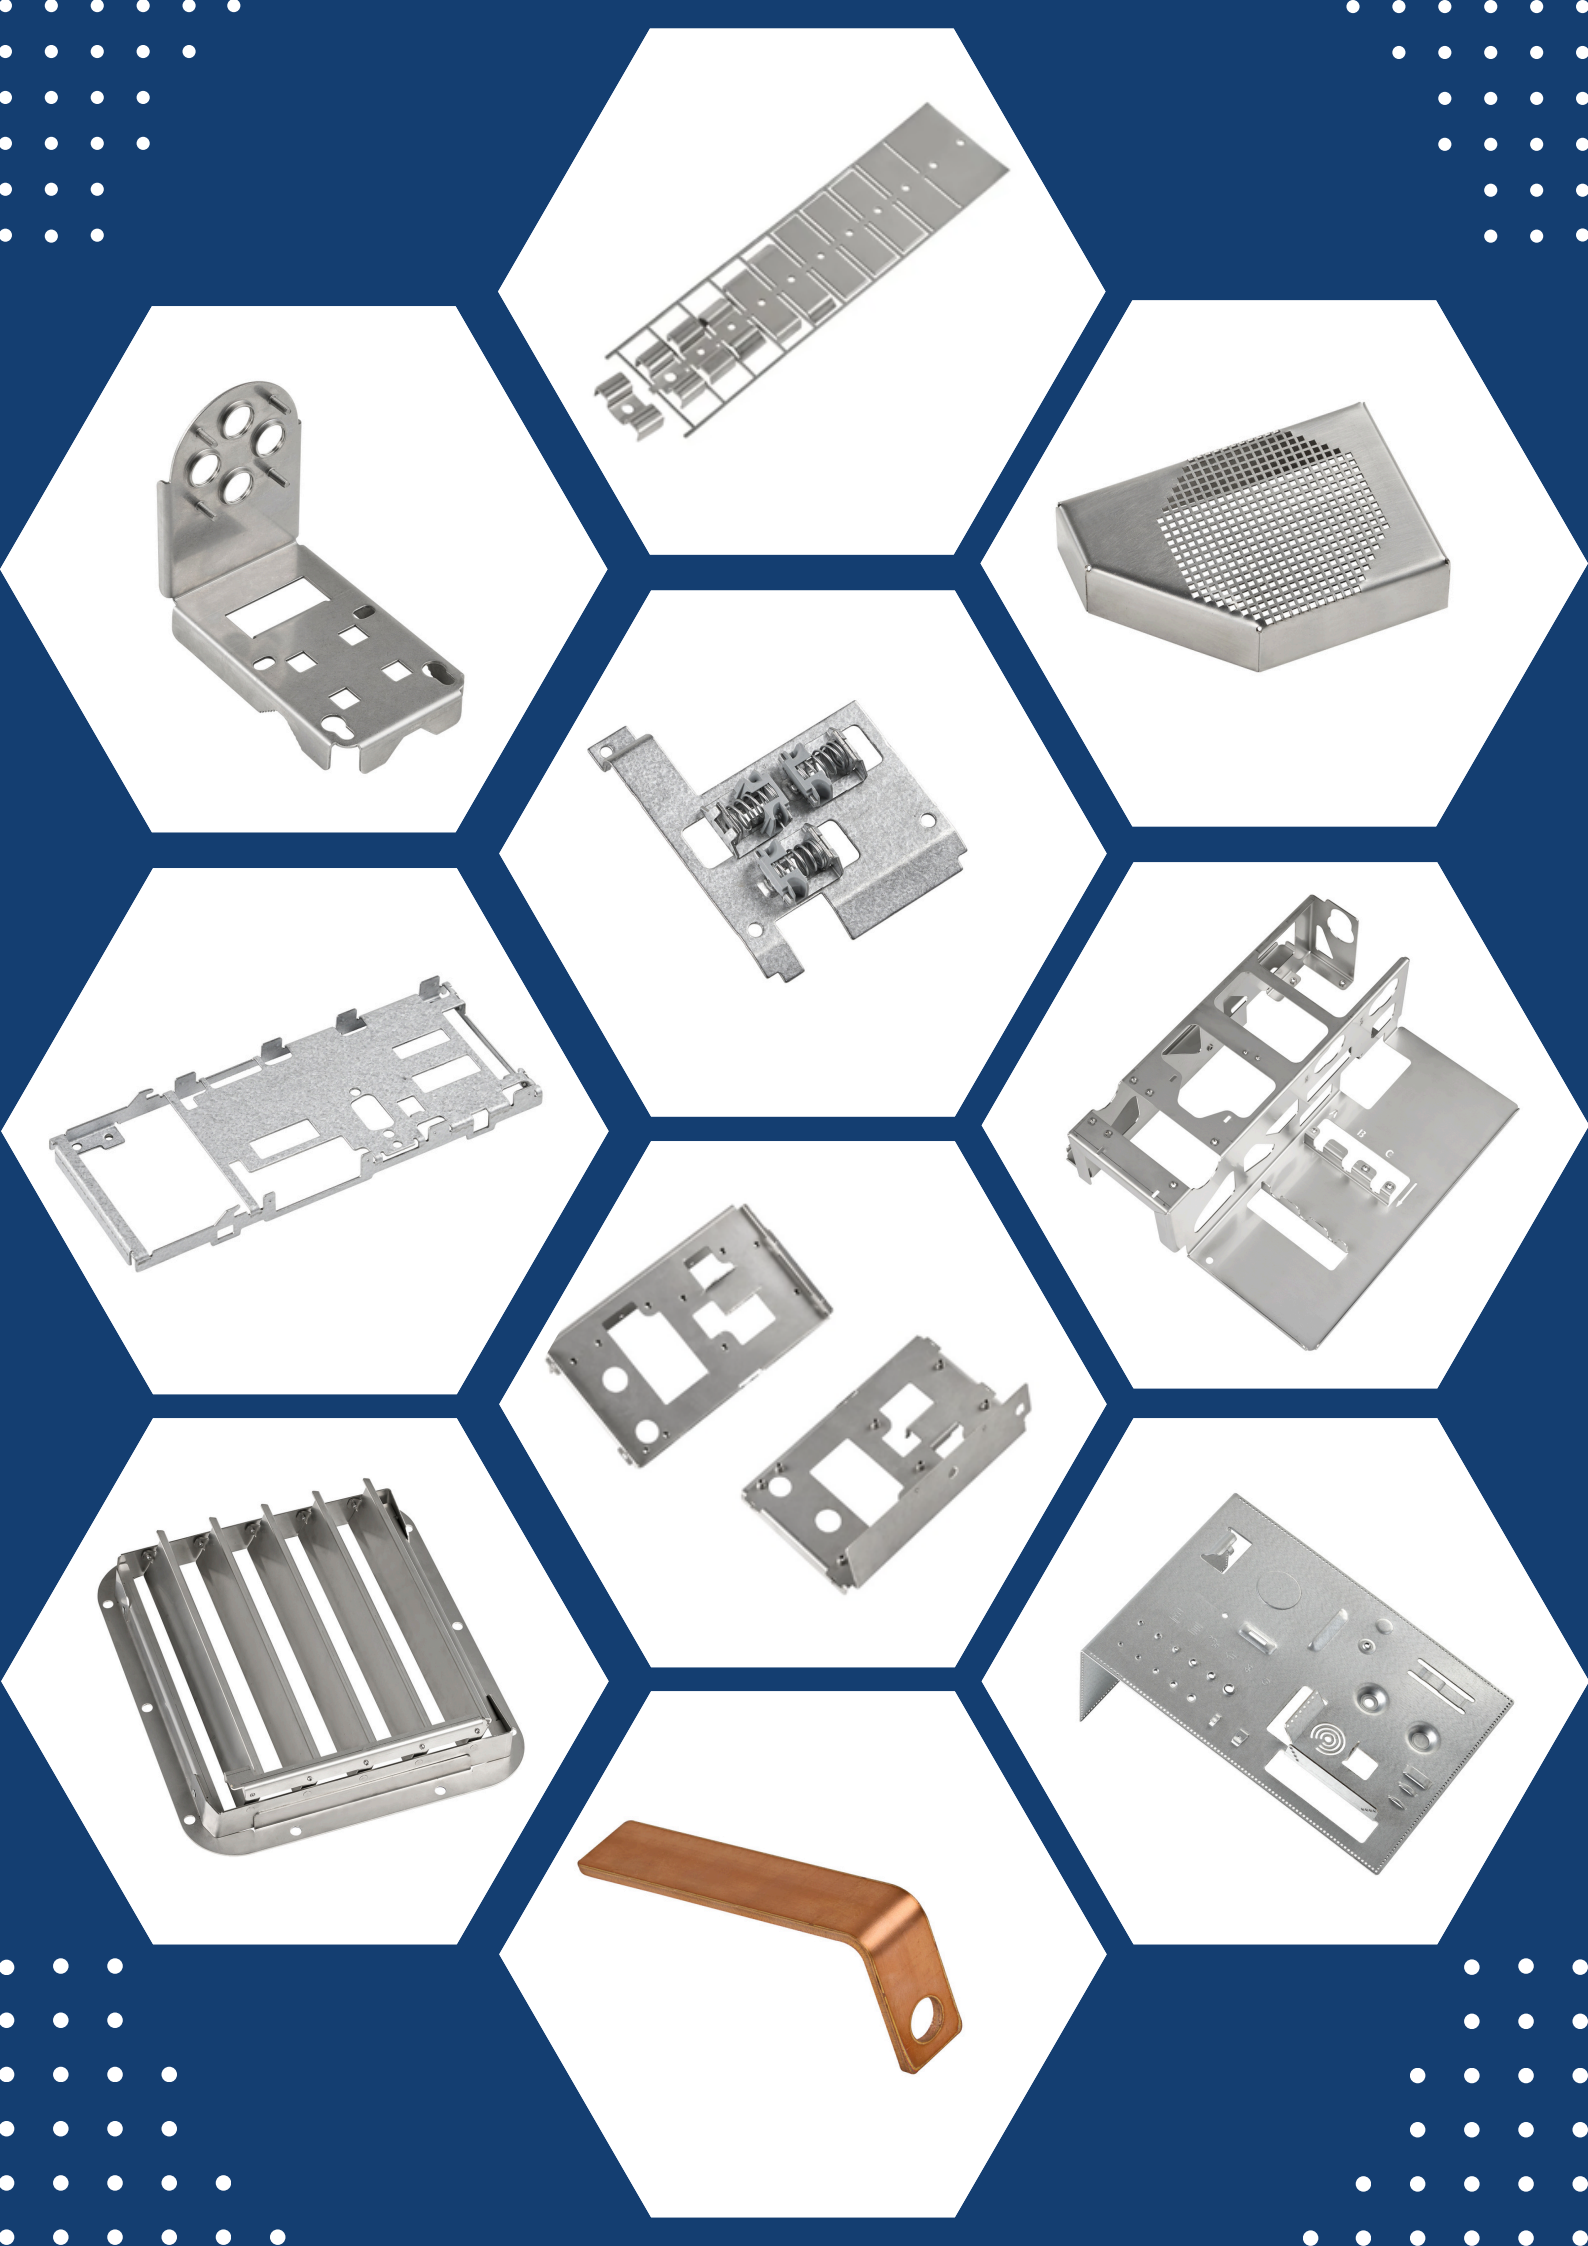

ADVANTAGES

ROBOT TECHNOLOGY

FLEXIBILITY

STATE-OF-ART
PRODUCTION EQUIPMENT

CUSTOMIZED SOLUTIONS

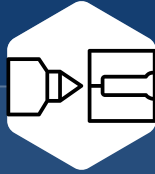

Sourcing

PROCESSES

Metal casting

Casting in carbon steel, stainless steel, brass, copper, aluminum, etc.

Die casting

Casting in light metals such as aluminum, zinc and magnesium

Injection molding

Molding of plastic parts in complex geometries in 2k and 3k as well as overmolding

Vacuum forming

Forming plastic parts in common plastic materials

CNC Turning and Milling

CNC Turning and milling on 3, 4 and 5 axis machines in plastic and various metals.

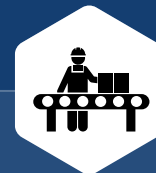

Deep drawing

Deep drawing in various metals

Surface treatment

Corrosion-protective surfaces such as zinc, etc., as well as wet paint, powder paint and anodizing

Assembly and special packaging

Partial assembly and packaging directly at our partner

MATERIALS

PLASTIC

SILICONE

EPDM

METAL ALLOYS

LIGHT METAL

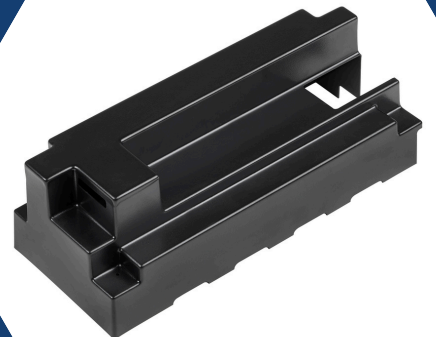

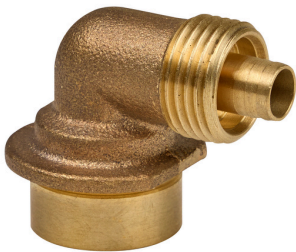

ADVANTAGES

+20 YEARS OF PARTNERSHIPS IN ASIA

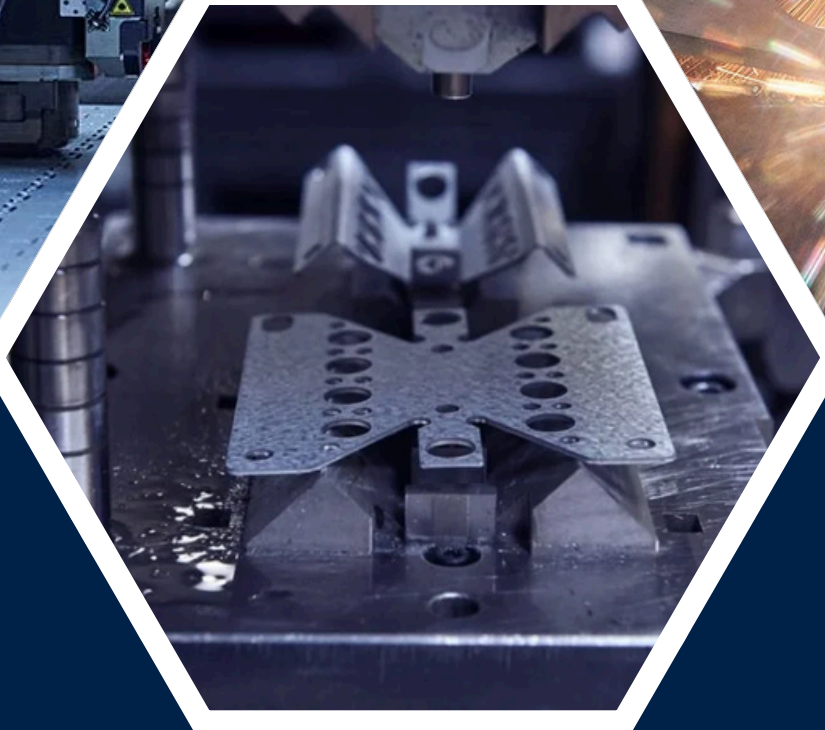

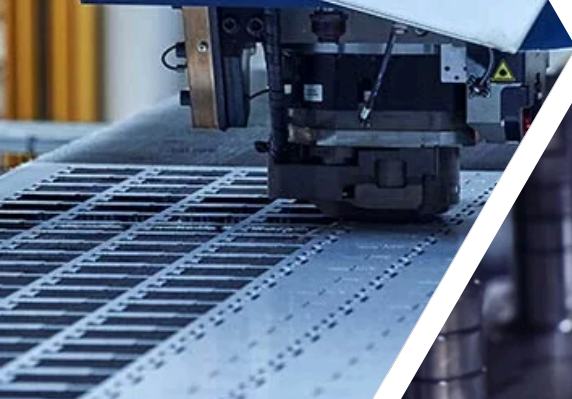

ON-SITE QUALITY ASSURANCE

COST OPTIMIZATION

STRONG SUPPLY CHAIN

SINCE 1967
